Uzbekistan is located in the heart of Central Asia, between two large rivers Amu Darya and Syr Darya. History of nations, living on this territory, is more than thousand years. This land became the motherland of civilization, which is perhaps one of the most ancient in the world.

Some of the earliest known inhabitants of this region were Indo-Iranians, who are thought to have migrated to the region around the second millennium b.c. By the 4th century b.c., after the campaigns of Alexander the Great, trade along the Silk Road increased, and the area emerged as an important trading center; cultural contact intensified, and a variety of religions flourished. On 31 August, the 6th Extraordinary Session of the Supreme Council declared the political independence of the country, which was officially named the Republic of Uzbekistan. 1 September was proclaimed Independence Day.
