Crane Dance ~

Cranes are auspicious creatures symbolising longevity, happiness and wealth. Standing at 30-metre tall that's equivalent to the height of a 10-storey building, each mechanical crane weighs 80 tonnes – as heavy as 10 adult African elephants. The cranes are powered entirely on four giant hydraulic power units, totally 5,000 horsepower – each HPU is good enough to fly a small aircraft. Watch how the two choreographed animatronic cranes romancing each other and the magical love story culminates as the pair transforms into "live" birds and takes flight!
